CONDITION ON ADMISSION AND PROGRESS OF CASE

History of Present Illness - One evening in 1913 after eating tainted fish had sudden severe pains, abdomen, cramps in nature. These disappeared the following day. This attack was similar to one in Dec 1918 which came on very suddenly 2 AM, while on a train near Toronto. Had not eaten any tainted food previously, as far as patient knew. Had cold sweat, prostration, severe abdominal cramps, nausea (no vomiting) & diarrhoea. Bowels felt knotted with the cramps. This lasted the one night. Ever since then has had cramps pain, but not very severe, more or less constantly during the day and sometimes at night. The first mouthful or two of food usually brings it on. Has always had a good appetite and has been eating well, except since last May when patient has restricted his diet. Since May he has lost weight. Is now 15-20 lbs underweight. In May 1919 he first noticed a mass size of large egg, slightly to left and above umbilicus - freely movable. Has not noticed any increase in size since then. Bowels have been regular (once daily) after eating has fulness of stomach, but no cramps now.
